DETAILED ACTION

*Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I, claims 1, 4, 7 and 10 are related to identifying a type of portable telephone set based on a response with respect to an operation start signal which is output to a data interface part of the portable telephone set.

Group II, claims 2, 5 and 8 are related to identifying the type of the portable telephone set based on a waveform of a signal output from a specific terminal of a data interface part of the portable telephone set.

Group III, claims 3, 6, 9 and 12 are related to identifying the type of the portable telephone set based on an allocation pattern of input and output terminals of a data interface part of the portable telephone set.

Group IV, claim 11 is related to identifying the type of a portable telephone set based on a pattern of an asynchronous signal output from a data interface part of the portable telephone set.

Group V, claims 13-15 are related to an identifying part identifying a type of the communication equipment and outputting an identification signal; and a switching part switching a communication protocol prestored for each type of the communication equipment, bon the identification signal.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
